DOG ATTACKS

Administration has received complaints concerning vicious dog attacks and nuisance pets. Once a written complaint is received concerning dogs or other pets it goes on file.

All home owners/tenants are responsible for their dogs and pets that roam freely, bark incessantly and cause general annoyance to neighbours. Please keep dogs fenced in or tired on a run.

Dogs that bark constantly should be brought into the home especially during the evening.

Home owners/tenants are advised to put in complaints in writing to administration if an animal is causing a nuisance for example: digging up gardens, taunting neighbor's pets that are fenced in, doing their business on neighbours' lawns etc.

8.2.1.8 As per the housing policy it states:

1st Warning is a writing to the owner from Council:

2nd Warning, the owner must pay the \$50 animal control surcharge;

3rd Warning, the pet owner must meet with Council;

4th warning is the removal of the dog.

Thank you,
Kassandra Doss
Housing Coordinator

1Shirley Scotchman, Eleanor Harry, Genevieve Thorne

Our Matriarch Ceda Scotchman told me when she went fishing people sat behind the person that was fishing waiting for their turn. People always shared the fishing area; this is our way we share, we are St'at'imc.

After I visited and talked with Ceda, I thought it was really important to have our traditional custom/law passed onto our future generations.

Luther Brigman wrote the Nxekmenlhk'alha (Our Law) on the painting. This painting will be hung in the Council of Chambers with a picture of Ceda and the above picture of her children.

Road trip ready

To keep your road trip smooth, here is what to check before you hit the road:

1. Check what you can see... start with a visual inspection of your vehicle:

- **Windshield wipers:** check the condition of the wiper blades.
- **Check for fluid leaks:** if you find one, note the colour, type, amount and where it is located under the vehicle.
- **Tires:** inspect tires for pressure, wear, cuts, bulges, blisters and uneven wear.
- **Lights:** test all interior and exterior lights.
- **General:** look for loose mouldings, cracks or stone chips in the windshield, cracked or broken light covers.

See an automotive expert if you have concerns or questions about any of these.

2. Fluids

Your car needs fluids during hot weather just as you do. Ensuring proper fluid levels can save you from costly repairs down the road. Check your oil regularly and keep up with your car's oil change schedule. Visit an automotive expert to have them check your transmission fluid, brake fluid, power-steering fluid and/or engine coolant. They will be able to safely top-up and ensure there are no other causes of concern such as a leak.

3. Hoses and belts

Hot weather can do a number on hoses and belts in your engine – especially if they have not been maintained or replaced regularly. Pop the hood and check for cracks, nicks, bulges, blistering or other damage on your engine's hoses and belts. If you notice any softness in the hoses that is a clear sign, they need replacing. Ask an automotive expert for an inspection if you are not sure.

4. Battery

You would not want an old battery to mark the end of your road trip. Summer heat is harder on your battery than winter weather. If your battery is getting on in years (car batteries last about four years on average), get it tested and replace it if necessary before you head out.

5. Stay cool

Driving on mountainous roads or crawling in traffic behind an accident can strain hard working engines – especially if you are loaded down with gear. Have your radiator and air conditioning checked and tuned up.

6. Be prepared

Keep a small car emergency kit ready and check it annually.

<https://www.bcaa.com/blog/automotive/getting-road-trip-ready>

Please report any concerning activities

Please call STP directly to report any concerning activities.

STP emergency number is 250.256.7767.

STP non-emergency number is 250.256.7784.

Directly reporting the activity will help the police respond faster in an emergency.

Friendly reminder that in the rental units as per agreement signed:

8. Except for casual guests, no other persons shall occupy the premises without written consent of the Landlord.

Housing needs to be contacted when you move someone into your rental unit. Then it needs to get approved by administration, and council that this ok. If approved a new rental agreement will need to get filled out and signed.

Thank you,
Housing.

Community Garden

I remember growing up we had to get up around 5 a.m. to weed the garden and later on to pick vegetables in the garden and the fruits on the trees such as: apple, pear trees, cherry/sour cherry trees, red currants, gooseberries, watermelon, cucumbers, tomatoes, carrots, potatoes, onions, lettuce, beans, and peas. We had to get up so early because it was too hot in the afternoon. The older sisters helped mom can fruit, vegetables, fish, deer/moose meat. The boys helped dad with fishing, hunting, hay and planting the garden; the girls brought the guys their lunch by horseback when they were working in the hayfield. I never much liked gardening as I remembered the hard work interfered with my playtime.

In those days, we did not have much technology to play indoors so we played outside, in the summer played evvy-ivy over (by throwing a ball over the old church roof), kick the can, you're it, rode bikes, horses. In the winter time it was no different we played on our sleds racing one another down the hill and just played in the snow. However, we all had our chores to do before we got to play, we took turns washing the dishes, mopping/sweeping floors, change sheets, make beds, helping mom with the wash by hanging and taking them off the clothes line. We did of course do a lot of bickering amongst each other doing our chores.. We also had to help take care of the horses, pigs, chickens and our cow named Daisy. When we played outside, mom had a hard time getting us to come in for our meals, but once we sat down the food disappeared really fast as there was 10 of us children, and often had many cousins and relatives for meals.

It was not until I moved back home that I became interested in trying to grow my own garden. I started by planting vegetables that I purchased in plastic cell containers. I still hear my brother Paul yelling at me from his porch "get that plastic off the garden this is an organic garden". I quickly planted the vegetables in the plastic containers mumbling underneath my breath and of course he could not hear what I was saying. This did teach me a valuable lesson - no chemicals put in the garden and soil. I also built a small garden at home and ensured it was fenced to keep animals from eating the plants. I was very excited picking vegetables from my garden; growing your "own food is not only healthy for you but also for the environment". It also saves \$\$, don't have to shop for vegetables in stores you don't know what chemicals and additives are put in to make them grow faster.

The lessons we learned from our parents allowed us to grow and become self-sufficient. Our parents left our earth when we were very young. My brothers and sisters grew up to be independent, hard workers. My hat off to the parents who are teaching their children the value of hard work. Elder Ceda said that her grandma made her roll a tire around the reserve several times to teach her not to be lazy.

July 2021 Horoscopes

Cancer (Jun 21–Jul 22)

HBD! So, the first few days of Cancer season might not be so hot since it's the end of Mercury Retrograde, but other than, that this month = all yours! What do you want in life? Who do you want to be? This is the start of a brand new year-long cycle for you, so any new projects, jobs, or relationships you initiate now are p. much guaranteed to have long-term significance—go out and get to work!

Leo (Jul 23–Aug 22)

Cancer season tends to be an emotional rollercoaster for you, Leo—Cancer's watery influence really rains on your parade! Your chart's zone of isolation and the completion of cycles is being activated for the next month, so anything (or anyone!) you have unfinished business with from the past year is coming back around for one last hoorah. Deal with the past and give yourself a clean slate this month, Leo. That way, when Leo season starts, you can thrive as the best version of yourself!

Virgo (Aug 23–Sept 22)

Cancer season is a super social time of year for you, Virgo. This is the best time of year to go out and make new connections. You're known for being astronomically picky about, well, everything, so your squad's not the biggest—but this month, you're having exciting experiences and forming meaningful bonds with new people. Basically, you're having the time of your life with your pals, and turning a few buddies into besties! Your social life's about to get a big glow up!

Libra (Sept 23–Oct 20)

People love how congenial and accommodating you can be, but it's really easy for others to walk all over you—including at the office. People oftentimes take credit for your work or try to overrule your great ideas, but this month, you're saying no! You're a total boss rn, Libra. You're investing a ton in the work you do, and you're finally receiving the credit you deserve! Just make sure you're not slacking though, because then all of your screw-ups will be shoved into the spotlight, too.

Scorpio (Oct 23–Nov 21)

Leaving your comfort zone is hard, but in order to become a more well-rounded, evolved person, you have to. This Cancer season, you're broadening your horizons. You're not being thrust out of your comfort zone, though—this is actually a pretty pleasant transit for you! This could mean traveling, taking a class, pursuing a new hobby, or a surprise encounter with someone from a to-

tally different walk of life. Regardless, this month is all about changing your perspective and growing as a person.

Sagittarius (Nov 22–Dec 21)

This month is reminding you of the importance of trust in your life, Sagittarius. At the end of the day, who do you know will always be there for you? Work on perfecting your relationship with them. If there isn't anyone who has your back like that (uh oh), then this month's the time to secure that solid, intimate connection. This is an intense month, Sagittarius, but there's also loads of potential for relationship-building experiences—you just have to be able to commit.

Capricorn (Dec 22–Jan 19)

If you're ready for some summer lovin', perfect—Cancer season's vibes are lighting up your chart's relationships zone all month long! Whether you're with your bae or your bestie, know that any time spent with someone else is time well spent. You're feeling open, agreeable, and eager to connect, so new friends (or maybe even a new boo!) are easier than ever to find!

Aquarius (Jan 20–Feb 18)

Your life's becoming a little, well, untidy. Your sleep schedule is nonexistent, your unchecked notifications are numbering in the thousands, and your place is a mess. Get up, Aquarius, because you gotta reorganize all your shit! You need to make a to-do list and cross everything off of it. This month, you can start new, healthier, and way more productive habits that will stick around for a long time—you just have to put in the work!

Pisces (Feb 19–Mar 20)

Love is in the air, Pisces! Your chart's fifth house, which governs romance, sex, and fun, is being lit up by Cancer season's energy for the next month. Hookups are way hotter and easier to come by now, and romance feels even more special—you're just lucky in love! One thing, though. Cancer's a super emotional sign, and you're an even more emotional sign, so if you're just looking for a fling, be careful—catching feelings is basically guaranteed.

Aries (Mar 21–April 19)

You're spending all your time at home right now, Aries. You're always accelerating forward, starting new things, and trying to keep life as fresh and exciting as possible. But this month, you're absolutely pooped. Take some time to rest, relax, meditate, and chill out. Instead of focusing on the future, take a look back at your "story so far," and find a way to get back in touch with your roots.

Taurus (Apr 20–May 20)

Cancer's water sign vibes mesh well with your earthy energy, so the next month's looking pretty nice! You're opening up to others more than usual, and whether you're making small talk, gossiping, or having a deeeeep heart-to-heart, connecting with others simply feels easy and natural.

Gemini (May 21–Jun 20)

This month, you're being pushed to take a stance that you normally don't—the stars are urging you to be less flighty and superficial, and become more serious, emotional, and sentimental. What (or who) truly holds value in your life, Gemini? Living in the moment is fun, and including newness and variety in your life is important, but at the end of the day, what (or who) do you cherish most? Whether it's a job, a passion, or a relationship, this month you're working on making it the best it can be.
